

TSAT | Health, Safety and Wellbeing

As the world starts to pick itself up, dust itself off and prepare to face a new normal alongside the still-present Coronavirus, we have implemented rules to help keep us all safe as we return to school.

While social distancing is still important we can reassure you that the health & safety and wellbeing of our students and staff is our top priority.

Important information for all family members:

If your child or anyone in their household has or is showing symptoms of Coronavirus such as:

- A new continuous cough
- A fever
- A loss of or change their normal sense of taste or smell (Anosmia)

Please do not bring your child to school and follow Government guidance for households with possible Coronavirus infection.

Wash your hands & always use a tissue

Washing hands as regularly as possible with hot water and soap. If your child is young, please practice this at home before returning to school. There will be plenty of opportunity to wash their hands throughout the day.

Children will be encouraged to use hand sanitiser during school hours too. NOTE: Please let your school know of any allergies to hand sanitiser as soon as possible.

We will also work to the traditional winter and flu season slogan of 'Catch it. Kill it. Bin it.' when it comes to sneezing. Remember to catch your sneezes in a tissue. Tissues are available in every classroom and should be thrown away after use.

Social Distancing

Social distancing has become a part of our everyday life since Coronavirus. Outside of school this means keeping unnecessary contact with those we do not live with down to a minimum. Keeping a distance from people will help to avoid catching or spreading a virus.

On school grounds please be conscious of how much contact and space you are giving people in playgrounds, corridors, the classroom and at the school gates.

And for your children, please actively remind them, especially en-route to school and over the weekends, to stay within their designated bubbles during school hours and to follow instructions – all put in place to keep them safe.

Keep it clean

Ensuring that our schools are kept clean is a key part of our plan. The cleaning team will be working throughout the day, around the school time timetable, to proactively clean areas before and after classes have used them.

For secondary school students this also means an element of independent cleaning. Before each lesson they will be expected to use hand sanitiser (unless allergic, then a hand wash) before entering the classroom and leaving the classroom.

They will then wipe down their desk before using. At the end of the lesson, they will be tasked with wiping down their desk again before departing.

Useful Resources during COVID-19

To help you during this time our Trust has put together a list of free resources that may be of benefit to you and your children. You'll find links to the resources on our Trust's [website](#).
